

The course outlines for K-2nd grade do not specifically mention the use of technology or the different cultural music styles and historical periods. However, technology is implemented on a daily basis in the music classes, through use of the computer (by students and teacher), electronic instruments, and other multi-media equipment. Likewise, the multicultural music and musical selections from various style periods and genres are embedded within each unit of the music curriculum. The wide variety of music representing many cultures and styles allows us to achieve State Fine Arts benchmarks 26.B.1c, 27.A.1a, 27.A.1b, and 27.B.1.
